

Terms of Reference (ToR) for Warehouse Stocks and Political Violence Insurance Coverage RFP

1. Background

The International Organization for Migration (IOM) is inviting proposals for comprehensive insurance coverage to protect its warehouse stocks worldwide. The IOM, as a leading UN agency in the field of migration, seeks to ensure the continuity of its operations through the effective management of risks associated with the storage of essential goods and equipment. These goods are critical to supporting the organization's mission in areas such as emergency response, migration management, and humanitarian aid.

2. Objective

The objective of this RFP is to secure insurance coverage that provides comprehensive protection against all risks of physical loss or damage to stocks stored in IOM's warehouses globally. This includes coverage for natural disasters, accidents, and political violence, ensuring the resilience and continuity of IOM's operations.

3. Scope of Coverage

3.1 Warehouse Stock Insurance Coverage

- Objective: To obtain insurance coverage safeguarding against all risks of physical losses and/or damages to stocks, aligning with the IOM's need for uninterrupted operations.
- Usual Commodities stored in IOM Warehouses
 - Non-Food Items (such but not limited to tarpaulins, kitchen sets, solar lamps, hygiene kits, clothing, mobile storage units (MSU), tents, sleeping mats, mosquito nets)
 - Medical supplies
 - Medical Equipment
 - Other perishable goods not listed above.**Refer to attached list for reference only.**
- Risks Covered (including, but not limited to):
 - Natural Disasters: Including, but not limited to, floods, earthquakes, hurricanes, tsunamis, and volcanic eruptions, with specific attention to geographical areas prone to such events.
 - Fire and Allied Perils: Coverage to include fires, explosions, and resultant damages from smoke or water used in firefighting efforts.
 - Accidental Damage: Including spillages, breakages, and damages incurred during handling and storage.
 - Theft and Burglary: Protection against loss or damage from break-ins, thefts, and pilferage, with special considerations for high-risk locations.

- Mechanical or Electrical Malfunction: Coverage for losses resulting from the failure of climate control systems or other warehouse infrastructure.
- Special Risks: Customized coverage for unique risks associated with the storage of sensitive materials, such as pharmaceuticals or perishable goods.
- Premium Calculation:
 - Premium is to be calculated based on the actual stock values submitted by the IOM Field Missions every end of the month in good faith retroactively. It should be a percentage of the stock value.

3.2 Political Violence Insurance Coverage

- Objective: To protect IOM's warehouse stocks against physical losses and/or damages resulting from political violence or disturbances, crucial for maintaining operations in high-risk areas.
- Risks Covered:
 - Acts of terrorism, sabotage
 - Riots, strikes, civil commotions
 - Malicious damage
 - Insurrections, revolutions, rebellions
 - Mutiny, coups d'état
 - War, including civil war
 - Looting, pillaging

Coverage should be applicable globally, with particular attention to high-risk regions where IOM operates.

List of warehouses is contained in Annex I. This list is not exhaustive and other locations maybe added or subtracted based on the operational needs of IOM. The same rate shall apply for new warehouses as for the current. Service Provider is requested to propose a simple and transparent process for enrolment of new warehouses in the policy. This should include the timeframe for approval, the procedure, necessary documentation needed from IOM, safety or management requirements and any other action needed from IOM.

4. Insurance Terms and Requirements

- **Valuation and Sum Insured:** Detailed guidelines on how the valuation of stocks will be conducted, including the basis for valuation (replacement value vs. market value) and the process for updating these valuations to reflect current stock levels and prices.
- **Deductibles:** Clearly defined deductible structures, potentially varying by risk category, with a rationale for selected deductibles based on risk assessments and past claim history.

- **Claims Process and Reporting Requirements:** An explicit outline of the claims process, including notification timelines, documentation requirements, assessment processes, and settlement timeframes. Include expectations for assistance in risk assessment and claims prevention strategies. Service Provider is also invited to offer online solutions, applications, software or interface which can be made available to IOM for claims filing, reporting of insured values, adding/removing warehouse, producing status reports etc.
- **Policy Term and Renewal Conditions:** Specification of the policy term, with a preference for multi-year agreements subject to satisfactory performance. Conditions under which the policy may be reviewed, renewed, or terminated should be outlined, including performance benchmarks and review mechanisms.
- **Compliance and Ethical Standards:** Emphasize adherence to UN procurement guidelines and ethical standards, including transparency, avoidance of conflict of interest, and expectations for confidentiality and data protection.
- **Advisory Services**
Upon request, the Service Provider may be engaged to provide but not limited to the following advisory services covering all IOM operations.
 - Advise on Strategic risk planning.
 - Claims services as stand alone, not related to the policy brokered by the Service Provider
 - Other advisory services subject to further agreement
- **Payment Terms:** Quarterly and Adjusted Annually
- **Annual Reports:** Special reports upon completion of the projects. IOM may require submission of special reports based on the projects. These reports must as a minimum include the following: a summary of all payments made by the IOM Field Mission, amounts claimed, amounts reimbursed and pending, details (location, date etc.) and reason for the claim.

5. Institutional Arrangement

- The contract will be centrally managed by the Manila Supply Chain unit (MSCU). However, each IOM Field Mission will enroll their respective warehouses under the Insurance Policy. Service Provider is required to notify MSCU of any addition/removal of IOM warehouse during the period of the LTA. Payment shall be made by each Field Mission.
- Monthly meeting will be conducted with MSCU to discuss issues/challenges from both parties (IOM Field Missions and Service Provider)

6. Duration of the Work

- Two (2) years with the possibility of one (1) year extension subject to satisfactory performance.

7. Vendor Qualifications

- **Experience:** Demonstrated experience in providing similar insurance coverage to UN agencies or large international organizations, with an understanding of the unique requirements and challenges. Minimum 3 years of solid experience.
- **Licenses and Certifications:** All necessary licenses and certifications to provide insurance services internationally, with specific attention to regions of operation.
- **References:** References from previous clients within the UN system or comparable entities, focusing on reliability and effectiveness of service.

8. Proposal Submission

For the purpose of generating offers whose contents are uniformly presented and to facilitate their comparative review; the following documents must be submitted:

1. **Eligibility documents as per eligibility reqts.**
2. **Filled Out Forms as per Request for Proposal (RFP)**
3. **Technical Proposal - Response to the TOR**
Scope of Coverage
Insurance Requirements
4. **Price Schedule (Financial proposal) as per RFP template**
