

STANDING COMMITTEE ON PROGRAMMES AND FINANCE

Twenty-second Session

IOM DEVELOPMENT FUND

(Final report: 1 January to 31 December 2017)

IOM DEVELOPMENT FUND (Final report: 1 January to 31 December 2017)

Background

- 1. An overview of the IOM Development Fund, which was established through Council Resolution No. 1035 of 29 November 2000, is provided at the sessions of the Standing Committee on Programmes and Finance.
- 2. The allocation and application of the Fund is guided by Executive Committee Resolution No. 134 of 3 July 2012 on budget processes and mechanisms. The Guidance Note 2018 on the IOM Development Fund explains the characteristics of the Fund and provides practical guidance on its operation and management. It can be consulted in the three official languages on the IOM Development Fund website (http://developmentfund.iom.int/).
- 3. With regard to the Fund's two lines of funding, Line 2 is broadly similar in its operation to Line 1, with one of the key provisos being that Member States subject to Article 4 of the IOM Constitution are not eligible to benefit from funding under Line 2.²

Fund administration

- 4. In 2017, a total of USD 8,926,623³ (including administrative and PRIMA costs) was available for the IOM Development Fund. A total of USD 1,422,236 was available for Line 1 funding, comprising USD 1,400,000 of Operational Support Income (see document C/107/6/Rev.1) and USD 22,236 of recovered funds from closed Line 1 projects. A total of USD 7,504,387 was available for Line 2 funding, which was composed of USD 6,127,496 in Operational Support Income, USD 395,928 of recovered funds from closed Line 2 projects, USD 630,676 from the Government of Sweden, USD 350,000 from the Government of the United States of America and USD 287 of private contributions made by individuals online.
- 5. A total of 53 projects were funded in 2017 through the IOM Development Fund, providing support to 102 eligible Member States. As in previous years, the distribution of allocations to each region was closely aligned with the representation of eligible Member States in those regions. In Africa, the IOM Development Fund supported 21 initiatives with USD 3,025,000, benefiting 52 eligible

Section IV, paragraph 1 of Executive Committee Resolution No. 134 states the following: "The Director General is requested to allocate one million four hundred thousand United States dollars from the Operational Support Income for the development of migration projects in favour of developing Member States and Member States in transition, on the basis of an equitable regional distribution, without prejudice to funds already allocated for these purposes, referred to as funding Line 1." Section IV, paragraph 2 states that: "25 per cent of Operational Support Income (excluding security) in excess of USD 20.0 million will be allocated to the IOM Development Fund referred to as funding Line 2.", while in paragraph 3 of the same section it states that "The total amount available for the IOM Development Fund (excluding direct voluntary contributions) cannot exceed total miscellaneous income (unearmarked contributions and interest income)."

- Section IV, paragraph 5 (a) of Executive Committee Resolution No. 134 states that: "Access to funding under Line 2 will be linked to outstanding contributions and Member States subject to Article 4 of the Constitution will not be eligible for funding." The phrase "subject to Article 4" refers to the status of a Member State whose current arrears in the payment of its financial contributions to the Organization equal or exceed the amount of the contributions due from it for the preceding two years and whose loss of voting rights in accordance with Article 4 of the IOM Constitution shall become effective in a year's time if at that time the Member State is still in arrears to the said extent, but not a Member State whose loss of voting rights has become effective but whose voting rights were maintained or restored by the Council after being satisfied that the failure to pay is due to conditions beyond the control of the Member State.
- The Governments of Belgium and the United States of America provided unearmarked contributions which are part of the Operational Support Income that funds the IOM Development Fund.

Member States. In Latin America and the Caribbean, USD 1,709,236 was allocated to 12 initiatives, benefiting 21 eligible Member States. In Asia and Oceania, 13 initiatives, benefiting 20 Member States, were funded for a total of USD 2,539,387. In Europe, USD 1,000,000 was allocated to six projects, benefiting nine eligible Member States. One multiregional project was approved for a total of USD 100,000, benefiting Member States eligible for Line 2 funding.

6. As at 31 December 2017, 131 active projects were being administered by the IOM Development Fund, over 50 per cent of which were in Africa.

PRIMA - Project Information and Management Application

- 7. By the end of 2017, all IOM Development Fund projects, including recent concept notes and project proposals, had been migrated into PRIMA a total of 684 entries. In total, 105 IOM offices (including Regional Offices) are using PRIMA to develop and review these initiatives. During November 2017, PRIMA received 6,375 visits.
- 8. With the development of the PRIMA for All system in parallel with the operationalization of PRIMA for the IOM Development Fund, the IOM Development Fund Unit has been able to share the lessons learned from its roll-out of the system, feed its requirements into the Organization-wide system and assist with the testing of that system.
- 9. PRIMA is proving to be very beneficial for reporting purposes, for reminding project managers of deadlines to be met and for keeping track of project implementation. It is also useful for staff members who are new to an office and who need to quickly access all relevant documentation and the latest updates on the status of a project. Similarly, Regional Offices can monitor the implementation of activities through PRIMA in preparation for on-site evaluations, without the need to request relevant documentation by email.

Review of best practices

- 10. In 2017, the IOM Development Fund Unit conducted a review of all migration policy-related projects that were initiated between 2007 and 2016 with a view to assessing their capacity-building and policy development components. The review focused on project performance and sustainability in order to improve project development and implementation and related thematic programming. The full report of the review is available on the IOM Development Fund website.
- 11. The review found that between 2007 and 2016, 23 migration policy projects had been funded by the IOM Development Fund, with a combined expenditure of USD 2.9 million, which represents 5 per cent of the total amount spent on projects during this period. The region in which the most migration policy projects had been implemented during this period, and which consequently had received the most funding, was Latin America and the Caribbean (52% of projects implemented and total funding of USD 1.4 million). All of the 23 projects reviewed had addressed Goal 10 of the Sustainable Development Goals (Reduce inequality within and among countries) and at least one of the Migration Governance Framework principles. More than half of the projects (57%) had also addressed Sustainable Development Goal 8 (Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all).
- 12. Seventeen project teams responded to the review questionnaire, reporting that almost all of the projects (94%) had achieved their planned outcomes and produced their expected outputs. In addition, all completed projects had reached the targeted direct beneficiaries, while 66 per cent had also reached indirect beneficiaries. Out of the 17 projects for which responses to the questionnaire were received, 8 had had positive unforeseen impacts, and no project had had a negative unforeseen

impact. Fourteen projects (82%) had received no-cost extensions, and follow-up activities/projects had been implemented after six projects (35%) had been completed. Each of the 17 projects had had at least one outcome evaluated as "sustained after the project ended", while all outcomes had been sustained in 13 projects. The most common outcome – the Government utilizes increased skills, knowledge and experience to more effectively manage migration – had been sustained in nine projects.

- 13. The three most frequently encountered challenges were a lack of collaboration from partners, a lack of coordination among agencies, and changes in government priorities.
- 14. Recommendations resulting from the review include:
- (a) Ensure early and constant liaison with stakeholders and partners to prevent and quickly address challenges.
- (b) To avoid needing to request a no-cost extension at a later date, improve the assessment of the amount of time required to implement project activities, consider limiting the number of outcomes, and take measures to prepare for the start of the project.
- (c) Better assess the social and political context.
- (d) To safeguard the sustainability of projects, ensure a continued, close and sound relationship with the relevant ministries; provide continued support to the government as a technical advisor; ensure institutional and legal policy coherence; and ensure consultations with and the involvement of civil society in the design, implementation and evaluation of migration policies.
- (e) Take note of previous project reports and reviews in order to build on lessons learned.

Staff support for the IOM Development Fund

15. The Government of Japan has provided funding for a part-time Junior Professional Officer for the IOM Development Fund Unit at Headquarters. Since March 2017, they have been a vital member of the Unit, reviewing project applications and reports, fundraising options and existing processes.

Ex-post evaluations and recommendations

- 16. Since the beginning of 2017, IOM has been committed to ensuring that ex-post evaluations of all funded projects are undertaken. All evaluations carried out during 2017 have been reviewed, collated and summarized. The main findings and recommendations have been collated into a report, entitled Report on the IOM Development Fund 2017 Ex-post Evaluations, which has been shared with project developers, managers, monitoring and evaluation officers and staff in the Regional Offices involved in the review of new project proposals and reports. The full report is available on the IOM Development Fund website.
- 17. Recommendations resulting from the review include:
- (a) Relevance Carry out increased theory of change analysis and improve related documentation; formulate interventions through participatory processes, in collaboration with the relevant IOM Country Offices and key stakeholders in the benefiting country or countries, to improve the level of buy-in, participation and understanding of partners regarding the project; and involve monitoring and evaluation experts in the design of the project results framework.

- (b) Effectiveness During project design and implementation, fully involve stakeholders and better link activities to governmental decision-making processes; establish a communication plan before commencing a new intervention in a new country to avoid the creation of misunderstandings among beneficiaries concerning IOM support (particularly important when working with vulnerable groups); and ensure that sound risk analysis is performed as part of the project development process.
- (c) Efficiency Assess the suitability of remote project implementation as it requires more resources, particularly in terms of project monitoring, and consider hiring local staff to ensure an IOM presence at project locations; continue to look for innovative, alternative funding modalities for workshops and training courses to improve project efficiency; use less ambitious project time frames and targets to avoid the need for no-cost extensions; and strengthen monitoring and evaluation capacity to enable projects to develop stronger monitoring tools and processes and to allow staff to collect more systematic data with regard to the medium-and long-term effects of the projects.
- (d) Sustainability Continue to engage with relevant stakeholders when possible after the project ends in order to sustain and expand the results achieved and to build on the migration management knowledge and capacity of governments, civil society and private sector actors; endeavour to ensure that projects that follow on from IOM Development Fund initiatives complement and reinforce past projects using an integrated programme approach; and consider starting a migration profile with Line 1 funding only if there is a possibility that activities could be continued with Line 2 funding.
- (e) Impact Increase publicity concerning project outputs, such as migration profiles, which is necessary to make them known among a wider strategic audience, both in the country and beyond, and to promote their use in policy development, project design, research and studies.
- (f) Cross-cutting aspects Include a gender focus throughout project implementation by taking into account gender-related structural inequities in all project activities, particularly in related documents and training activities.

Eligible Member States and allocations: 1 January to 31 December 2017

18. This report includes the following annexes:

Annex I: Line 1: Member States eligible for allocations under the IOM Development Fund, by

region, as at 31 December 2017

Annex II: Line 2: Member States eligible for allocations under the IOM Development Fund, by

region, as at 31 December 2017

Annex III: Line 1 and Line 2: IOM Development Fund regional distribution chart: Approved

projects from 1 January to 31 December 2017

Annex IV: Line 1 and Line 2: IOM Development Fund financial summary: 1 January to

31 December 2017

The Line 2 list of eligible Member States (and budget for each region) cut-off date for the year is 30 June. Bangladesh, the Plurinational State of Bolivia, Djibouti, Haiti, Malawi and the Sudan, became eligible for Line 2 funding when they came off the list of Member States with outstanding assessed contributions to the Administrative Part of the Budget which equal or exceed the amount due from them for the preceding two years, which took place after 30 June 2017.

Note: The Cook Islands, Cuba and Dominica are not included in the above list as they were admitted as Member States of the Organization at the 108th Session of the Council, held from 28 November to 1 December 2017.
