- IOM Health and WASH work closely together to support a holistic response to the cholera outbreak, focusing on cholera prevention interventions. IOM teams trained health hygiene promoters to provide hand washing and environmental hygiene messages amongst the community at the UNMISS base in Tong Ping, while IOM WASH continues to ensure the supply of safe drinking water to displaced people at the site.
- In partnership with MSF, IOM implemented a Oral Cholera Vaccination (OCV) campaign at the UNMISS base in Tong Ping. To reach as many people as possible a multi method approach was taken: OCV on exit for IDPs relocating to UN House; a mass campaign in Tong Ping on 27-29 July; and health screenings for relocation of IDPs.
- 40 IOM Health and hygiene promoters are active in the UNMISS base in Tong Ping, providing messages on good health and hygiene, focusing on hand washing, safe drinking water, and safe food practices. In collaboration with Impact Health Organization IOM has begun health and hygiene promotion in the Tong Ping neighborhood (Juba Na Bari).
- IOM has maintained active engagement and provided technical support to the Health Cluster and the National Cholera Taskforce. At the request of the Ministry of Health and the Health Cluster, IOM geospatial information specialists are regularly mapping cholera hotspots to enable fast and targeted responses to the outbreak.

IOM in partnership with MSF conducted an OCV campaign at the UNMISS base in Tong Ping
