SITUATION OVERVIEW

Inside Syria

In the first quarter of 2021, more than 6.6 million people remained displaced inside Syria. Out of these, 2.7 million individuals are in the country's northwest region, where armed hostilities, economic collapse, limited humanitarian access, and the spread of COVID-19 have driven humanitarian needs to catastrophic levels.

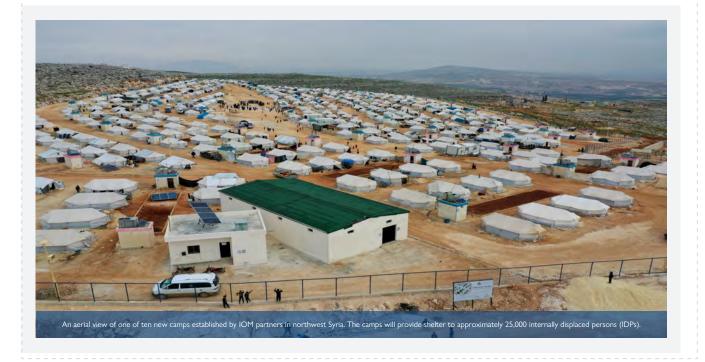

Despite an overall decrease in large-scale military operations since a March 2020 ceasefire, in March 2021, airstrikes and hostilities again increased. Attacks claimed civilian lives, including women, children, and humanitarian personnel, and damaged essential humanitarian infrastructure such as a hospital and supply depot. As violence continues, the reported increase in targeting of civilian and humanitarian infrastructure is extremely concerning and indicative of the deteriorating environment in northwest Syria (NWS).

Early 2021 also saw abnormally heavy rainfall and flooding across Aleppo and Idleb governorates, where over 1.6 million internally displaced persons (IDPs) live in last resort camps, informal settlements, reception centers (RCs) and collective centers - the majority in Idleb.

The storms damaged over 400 IDP sites, affecting more than 150,000 people. Over 7,700 tents were either damaged or destroyed due to flooding, leaving IDPs even more vulnerable. Affected populations require immediate humanitarian assistance including tents and non-food items, as well as interventions like infrastructural improvements on drainage systems that reduce the risk of recurring flooding in sites.

Floods can also hinder humanitarian access to sites, limiting the provision of emergency support when needed most. Following heavy rainfall, stagnant water poses a health and sanitation hazard in IDP sites. Overcrowding and poor sanitary hygiene conditions in IDP sites increases health risks for IDPs, including susceptibility to COVID-19 spread.

While figures of COVID-19 spread in northwest Syria (NWS) are incomplete due to severely limited testing capacity, the situation is dire especially for displaced communities who often live in overcrowded conditions and lack access to basic protective resources. Surveillance, isolation, and health services in NWS are limited, as are stocks of essential protective equipment and disinfectants.

COVID-19: Across the Region

As the spread of COVID-19 continues to severely impact the region, lives and livelihoods are at stake. IOM works to ensure refugee, migrant, and host communities in Syria's neighboring countries are supported to meet their basic needs and mitigate the risks of COVID-19 transmission. International support and commitment is urgently needed to ensure vulnerable communities have the resources to remain resilient.

In response to the COVID-19 pandemic, IOM in **Turkey** has provided hygiene kits to 6,000 individuals in Hatay province and baby hygiene kits to 1,000 families in Şanlıurfa province. IOM has also provided personal protective equipment (PPE) to five local municipality institutions in Gaziantep, Hatay, Izmir, and Kilis provinces which serve more than 300,000 beneficiaries.

In **Jordan**, IOM continued its support of the Ministry of Health and the Royal Medical Services response to COVID-19. IOM delivered capacity building sessions targeting 89 doctors and medical staff from the two institutions, focused on COVID-19 surveillance methods as well as methods for other communicable diseases. This exercise was part of a broader initiative to work with Jordanian authorities to improve humanitarian border management and ensure access to health for those in Jordan.

In **Iraq**, IOM continued to engage refugee communities in camp and non-camp settings to ensure awareness about the risks of COVID-19 and methods to mitigate the spread of the disease. IOM also worked with communities impacted by the economic hardship of the pandemic to increase access to livelihoods and develop local business.

In **Lebanon**, IOM continued to support local health institutions through facilities support as well as outreach activities in refugee, migrant, and host communities.

TURKEY

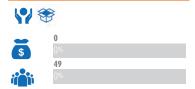

In the first quarter of 2021, IOM Turkey supported 30,000 Syrians under Temporary Protection withfood kits through its partners. Further, 5,135 individuals received e-transfer debit cards to purchase essential items for the winter, while 1,098 individuals received shelter and 609 individuals WASH rehabilitations.

56.615 people benefited from 19 municipal infrastructure rehabilitations, which included the rehabilitation of sports centers, robotics coding center, women's health guidance center, and several municipal buildings, libraries, vocational training centers, schools, and parks.

IOM further supported 6,179 beneficiaries through social services and activities at community, provided of guidance and counselling activities to 19,373 beneficiaries with municipal migrant/community center services, 627 individuals with emergency case management and 5,514 individuals with mobile psychosocial support services and virtual group sessions.

IOM also supported 5,405 students access to education by rehabilitation of 66 classrooms, 1,730 students had transportation to access education, and continued tailored support for 55 children with special learning needs.

IORDAN

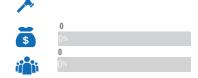

IOM continued to assist 1,230 vulnerable refugee households (3,048 individuals) with monthly multi-purpose cash assistance to help cover their basic needs.

IOM also launched a pilot intervention to provide refugee survivors of gender-based violence (GBV) with one-time or short-term emergency cash assistance to address protection needs.

IOM also continued to provide transportation assistance between camps for family reunification as well as other needs identified on a case-by-case basis through referrals from UNHCR and the Syrian Refugee Affairs Directorate (SRAD). During the reporting period, IOM provided transportation assistance to 125 Syrian refugees.

Finally, IOM continued its support for humanitarian border management by improving border facilities and infrastructure at points along the Syrian border. This initiative engages national authorities and promotes a stable and humanitarian border protocol.

IRAQ

Due to the increasing economic deterioration following the impact of COVID-19, IOM is supporting job creation and livelihood opportunities in Iraq. These initiatives help refugee, migrant and host community households secure income streams in order to better meet their needs.

IOM supports small and medium sized enterprises through the Enterprise Development Fund (EDF) to increase their employment opportunities. At the same time, IOM works with refugee and host community households to build their employable skills and start micro-businesses.

In the first quarter or 2021, IOM completed the selection of 375 individuals who will participate in the Individual Livelihoods Assistance (ILA) programme. This initiative gives training and resources to help individuals launch their own businesses or secure employment through a vocational trade.

IOM also launched an outreach campaign to introduce the EDF to targeted communities and ensure they are aware of upcoming application processes. School transportation services remained paused, as schools continue to be closed due to COVID-19 restrictions.

LEBANON

In Lebanon, IOM continues to work with UN agencies, local partners, and government counterparts to ensure the needs and perspectives of Syrian refugees and migrant communities are voiced and included in assistance measures.

Lebanon is facing a multifaceted crisis in which host communities are also increasingly in need of support. IOM and its partners continue to deliver services which target both host, refugee, and migrant populations, in order to promote social cohesion and shared progress while addressing individual needs such as health, and income generation, as well as community needs, such as improved local infrastructure in areas facing tensions.

In the first quarter of 2021 IOM has worked closely with interagency partners and the donor community to mobilize resources and increase the reach of services in the coming months.

Upcoming programs will contribute to bridging the humanitarian-development nexus by addressing urgent needs while supporting long-term resilience and growth.
